

A2 white light.

~~wherein said white light is introduced into said liquid crystal panel.~~

5. ~~(Amended) An electronic device comprising:~~

~~a liquid crystal panel:~~

~~a light source comprising 3-color light emitting diodes for producing three primary colors for additive color mixing; and~~

~~a scatterplate for scattering rays from the 3-color light-emitting diodes to produce white light.~~

~~wherein said white light is introduced into said liquid crystal panel from a back of said liquid crystal panel.~~

Please add new claims 7-9 as follows:

~~7. An electronic device comprising:~~

~~a liquid crystal panel comprising an active matrix substrate and a counter substrate;~~

~~a light source comprising 3-color light emitting diodes for producing three primary colors for additive color mixing; and means for mixing rays from the 3-color light emitting diodes to produce white light,~~

~~wherein said white light is introduced into said liquid crystal panel from a side of said counter substrate of said liquid crystal panel.~~

8. A device according to claim 7 wherein said counter substrate has a plurality of inclined surfaces on a back of said counter substrate.

9. A device according to claim 7 wherein the electronic device is a video camera, a digital camera, a head mounted display, a car navigation equipment, a personal computer, a mobile computer, a cellular phone or an electronic book.--
